ENPRESS LLC – NEW White Series Filters for Cartridge Tank™

EASTLAKE, Ohio – ENPRESS LLC, is pleased to announce the introduction and availability of a new series of filtration solution for the Cartridge Tank™ filtration vessel, the **WHITE Series**. This POE (Point-Of-Entry) filter series is a 0.5 cubic foot empty media cartridge for filling of granular filtration media.

Utilizing ENPRESS's patented Vortech® full distributor plate technology, the cartridge and medias can be used in up-flow or down-flow service depending on the application and preference of the installer, for maximum efficiencies and service flow rates. The cartridge is also available in a Mid-Vortech® configuration that splits the cartridge equally into 0.25 cubic foot of available area per chamber. This allows for separation of different medias and increased efficiency of the media bed.

Other features include a removable Top Cap that has a locking feature that can be used for limiting access to the internal medias by the end-user, and special Rings on the bottom that allow for hanging of the cartridge for easy change-out of medias. The **White Series** is also being made available with a returnable box option for regeneration and return requirements to the supplier.

This **ONE - Water Filtration Simplified™** filter series is ideal for a wide range of Residential, Food Service, Commercial, and Industrial applications, and can be used for multiple applications from Service DI, POE for city or well-water installations, Rental Programs, Exchange systems, high-purity pre- or post-filtration applications, etc...the options, configurations, and solutions are endless.

ENPRESS **Cartridge Tank™** is a direct replacement for small and inefficient 2.5" or 4.5" housings, or expensive Stainless Steel cartridge housings, and is an NSF 61 listed device. **SEVEN** filtration series options are currently available: **Green, Orange, Yellow, Blue, White, Red, and Purple**. Each "series" offers unique filtration capacities and flow rates from residential requirements up to 150gpm. **Cartridge Tank™** is specifically designed for Residential, Light Commercial, and Commercial Point-of-Entry (POE) installations and applications. The patented and patent pending ENPRESS Cartridge Tank™ filtration system features an easy to access top and bottom opening for use with multiple filtration connections and solutions, in a lightweight and cost effective package. With multiple configuration options, this is the filtration solution of the future...100% non-metallic!

ONE - Water Filtration Simplified™

ENPRESS LLC is a worldwide leading manufacturer of composite pressure vessels for use in water treatment. The exclusive co-polymer polypropylene liner formulation provides superior performance in both hot and cold temperature environments, along with superior chemical, impact, and abuse resistance. ENPRESS vessels are manufactured with an industry exclusive liner design and formulation that offer superior benefits and features...100% Made in the USA. More information is available on the company's website at www.enpress.com or by calling 1-866-859-9274.
